DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 6 and 7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.
3. The specific exclusion of low molecular polyethylene and/or copolymers thereof is considered new matter.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 6-15 17-46, 48-148 and 151-153 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting for the reasons set forth in the paper mailed 7/14/06. Applicants request that the rejection be held in abeyance until the claims are allowed is acknowledged.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

Claim Rejections - 35 USC § 103

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

7. Claims 6-15, 17-46, 48-136, 145-148 and 151-153 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Takeshi et al. US 5,079,287.

8. The rejection set forth under 35 USC 102/103 in the paper mailed 5/31/07 is deemed proper and is herein repeated.

9. The newly amended claims and remarks have been fully considered but have been found not persuasive.

10. Applicants argue that claims 6 and 7 are amended to exclude the Lucant-HC-10. This is not clear given the new matter rejection. In the event that the claims are interpreted so as to exclude the Lucant-HC-10, then the exclusion thereof is obvious

given that case law has well established that it is prima facie obvious to leave out a known compound and lose its known function.

11. Applicants argue that claims 8, 9, 41-46, 48-124, 126-132, 138-148 and 152 are directed to the propylene or butene polymers. It should be noted that claims 137-144 are no longer rejected over Takeshi. The broader and more generic claims are anticipated or obvious from the disclosure at column 5 lines 45+ where copolymers are discussed. These are seen to overlap with and render obvious the limitations as claimed.

12. The species of oils and/or plasticizers identified in claims 10, 11 and 15 are seen to be anticipated or obvious the oils discussed at column 9 lines 5+. The genus and species of oils claimed are seen to overlap with those disclosed herein.

Conclusion

13. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
